Full Stack Web Developer & Designer

(Including frontend development, UI/UX, website design)

Work Experience (significant projects)

Concern Shell, representative office in Russia

Frontend Developer and Designer (contractor)

2019 – present

Advancement of the online system of the service quality control based on video analytics. The system allows to increase profitability by 2.8 times by tracking various specific KPIs for retail chains.

In 2019 I got existed front on Angular, made it up again for adaptability. I'm implementing new functionality and a third-party API for new video cameras, redesign and design of interface, website. I work together with a team of 5 developers and interact with them. I participate in drawing up the technical design specifications and technical solutions and take part in product marketing for other chains.

Institute of Cytology and Genetics,

Siberian Branch of Russian Academy of Sciences

assa.bionet.nsc.ru

Full Stack Developer and Designer (contractor)

2009 – present

I wrote the first version of the system in 2009 — a self-written SPA on jQuery + PHP5 + MySQL. After that my responsibilities were adding functionality, integration with the API of publishing systems, caching and optimization (when the number of users exceeded 2000 and reports with statistics began to slow down).

Starting from 2021, I lead a small team, and we are rewriting the entire system to React: Hooks, Redux, Thunks, JWT on top of LDAP. I am rewriting the backend in PHP 7, the database remains on MySQL up to optimization and normalization of the database.

I am responsible for preparation of the technical design specifications together with the customer and for all architectural and technical solutions.

Well Done, gratuity payment system via QR codes

welldonego.com

Frontend Developer and Designer (contractor)

2022 – present

From the previous developers I got the front on Vue, I examine it, redesign its design and marketing.

Autodesk

Web Designer, Full Stack Designer, Web Developer (contractor)

2006 – present

I am the main designer-contractor of the Autodesk Company in the CIS region.

I design the events, interfaces of the partner mobile applications, I design the advertising campaigns, design and make up websites, landings, various graphics and many other.

LEDAS

Web Designer, Web Developer

2003–2009

Two major projects in the company:

1. A universal bug tracker created specifically for the interaction between the team and the Dassault Systemes team of developers.
2. I am the author and developer of the multi-vendor portal isicad.ru, which is the most known one within Russia CAD/CAM/CAE community.

Education

2000 - Siberian Federal University, postgraduate course of the Faculty of Mathematics, specialty "Substantiation of difference schemes of inverse problems". I taught computational mathematics for 2 years at the university.

Additional Education

PHP 5-7, MySQL, Apache, nginx

Adobe CC (Photoshop, Illustrator, inDesign, Premiere), Figma

Fundamentals: OOP, DBMS, HTTP, REST, SCRUM/Agile, Solid, Java etc.

About Myself

I am looking for a remote job in the field of web development. I am cross functional developer with the highest qualification and experience in Frontend development, UI/UX and web design. I do large web projects both alone and as a part of a team. I would take the legacy project for support and refactoring with pleasure.

I spend the most part of my free time for studying new things in my profession. I am good at working in a team and I love teamwork, I like to conduct and receive code review, and I am also able to achieve maximum efficiency from my versatile skills by doing projects alone. I keep track of the tendencies in web development as well as in design and try to apply new things.

Since 2009 I have been engaged only in the project work as a sole proprietor, but I am ready to consider other options.

I have made up more than a hundred websites and landing pages of different functionality on various platforms and CMS. Among my customers there are companies MONT, CSD, Dassault Systemes, Microsoft, PTC, Bentley, Softway, 1C, ESET.

My Team

I permanently cooperate with several professionals in related specialties: internet marketing, Beatrix, Tilda, microservices, etc. I can involve the required specialists into a large project work in a short time. In different projects I perform varied roles: team leader, project manager, contractor, programmer.
